TRAINING ACCESSORIES 🔥🔥🔥

## COMPATIBLE WITH ALL LEADER FLAME GENERATORS

FOR CUSTOMISING AND VARYING YOUR TRAINING SESSIONS

To **familiarize** students with all fire extinguishing situations, LEADER offers modules for all of its flame generators capable of **simulating specific situations**: computer screen fire, rubbish bin fire, deep fryer fire, electrical cabinet fire, aerosol explosion, electric motor fire and oil explosion.

These training modules give trainees the chance to practice:

▶ recognising the type of fire (class A, B, C, D or F fires)

▶ selecting the appropriate extinguisher

   (water spray, water plus additive, powder, CO2 or foam)

▶ using the right technique to put the fire out

   (spraying the extinguishing agent onto the fire, covering the fire with a wet cloth, etc.)
